

Global Zevalin Market: Key Trends, Market Share, Growth Drivers, and Forecast for 2025-2034

The Business Research Company's Zevalin Global Market Report 2025 – Market Size, Trends, And Forecast 2025-2034

LONDON, GREATER LONDON, UNITED KINGDOM, February 10, 2025

[/EINPresswire.com/](https://www.einpresswire.com/) -- How has the Zevalin market evolved and what's anticipated in its future growth?

The zevalin market size has seen significant growth XX HCAGR in recent years. Expanding from \$XX million in 2024 to projected \$XX million in 2025, the impressive compound annual growth rate CAGR of XX% within this period can be linked to rising incidences of non-hodgkin lymphoma. Other contributing factors include an increasing demand for personalized medicine, surging healthcare expenditure, and the growing adoption of radioimmunotherapy.

Updated 2025 Market Reports Released: Trends, Forecasts to 2034 – Early Purchase Your Competitive Edge Today!"

The Business Research Company

Shaping the future, the zevalin market is anticipated to experience a substantial growth XX FCAGR in the next few years, reaching \$XX million in 2029 from \$XX million in 2025. This calculated increase is largely attributed to the rising prevalence of cancers, growth in healthcare infrastructure, more emphasis on early diagnosis, a rising demand for outpatient treatment options, and increasing

government support for cancer treatment initiatives.

What key drivers are fuelling growth in the Zevalin market?

The significant rise in non-Hodgkin's lymphoma cases is considered a key propellant in the zevalin market. Non-Hodgkin lymphoma, a collection of blood cancers originating in lymphocytes, significantly impacts the lymphatic and immune system. Various causes range

from an aging population, increased exposure to risk factors like immunosuppression, environmental factors, and lifestyle changes; however, Zevalin, a monoclonal antibody, targets CD20, a common protein found on B-cells in non-Hodgkin's lymphoma. It is administered to destroy cancerous B-cells and shrink tumors increasing remission probability.

To illustrate, in January 2024, the American Cancer Society reported non-Hodgkin lymphoma to be among the most prevalent cancers in the US, making up around 4% of all new cancer cases. That year, an estimated 80,620 individuals, including 44,590 males and 36,030 females, were diagnosed, further driving the growth of the zevalin market.
