

# Freedom Energy and Walden Renewables Development Announce Full Subscription of Solar Project in Eversource Territory, NH

AUBURN, NH, UNITED STATES, February 10, 2025 /EINPresswire.com/ -- [Freedom Energy Logistics](#) (Freedom Energy) and [Walden Renewables Development](#) are pleased to announce the complete subscription of Walden's 5 MW solar project situated in Chester, NH. In Q4 2023, Walden engaged Freedom Energy to manage the off-take and administration of their asset within New Hampshire's Group Net Metering (GNM) Program.

Freedom Energy Logistics is a leading energy advisory. The company offers comprehensive energy supply management and renewable energy solutions supporting energy goals and sustainability objectives for businesses and organizations.

"Walden is very pleased to continue to grow the renewable energy landscape in New Hampshire. Renewable projects such as these generate strong local revenue, create jobs, and help rate payers manage ever increasing utility bills," stated Henry Weitzner, CEO of Walden. "Partnering with the local team at Freedom Energy was a strategic decision, and along with the support from local communities, Freedom Energy was essential in bringing this project to completion. The cooperation and dedication from all parties involved has been vital."

We are excited to see the full subscription of the solar project in Chester, NH. This milestone is a testament to our commitment to providing innovative energy solutions that benefit our clients."

*Bart Fromuth, Chief Executive Officer, Freedom Energy*

"We are excited to see the full subscription of the solar project in Chester, NH," stated Bart Fromuth, CEO of Freedom Energy. "This milestone is a testament to our commitment to providing innovative energy solutions that benefit our clients and the environment."

According to New Hampshire law, only political subdivisions can serve as group net metering off-takers or members for projects with a production capacity between

1 and 5 MW. Coos County and Manchester Water Works are collaborating with Freedom Energy and Walden on this project. It is anticipated that the array will become operational in 2026 or

2027, subject to the interconnection queue.

"To bridge the gap between clients signing solar agreements and the actual project completion, Freedom Energy provides an innovative, unique solution ensuring uninterrupted benefits even before the solar asset is operational," stated Fromuth. "We developed Freedom's Hydro + Solar program to assist our off takers in spanning the often-multi-year gap between signing solar group net metering agreements and the actual construction and interconnection of the array."

While Manchester Water Works and Coos County await the activation of their array, both entities will receive and benefit from GNM rebates provided by Freedom Energy's qualified hydro generators, as part of the Hydro + Solar program.

"Coos County has participated in hydro group net metering through Freedom for several years, but the solar project will further enhance the County's financial advantage," stated Coos County Administrator Mark Brady. "We anticipate the project's completion and the beneficial impact it will have on Coos."

#### About Freedom Energy Logistics

Founded in 2006, Freedom Energy Logistics is a leading energy advisory. The private company offers comprehensive energy supply management and renewable energy solutions supporting energy goals and sustainability objectives for businesses and organizations throughout the U.S. Freedom's team of energy experts has worked with and delivered energy saving, environmentally responsible solutions for some of the largest commercial and industrial companies, municipalities, universities, healthcare facilities, and businesses.
