

The Latest Construction Innovations and Industry Insights - February 13, 2025

Peer-to-peer digital content sharing for construction and building professionals

SUNDRE, ALBERTA, CANADA, February 13, 2025 /EINPresswire.com/ -- Since its establishment in 2003, Construction Links Network has emerged as a premier news and information hub in the construction sector. With a commitment to enhancing the digital presence and search engine visibility of its members, Construction Links Network has become an indispensable resource for a wide array of professionals. This includes construction managers, contractors, developers, building and property managers, architects, designers, engineers, and government officials.

As a dynamic hub for digital content dissemination, Construction Links Network offers its members diverse engagement opportunities through news releases, company announcements, blogs, podcasts, webinars, case studies, whitepapers, and videos.

This week's featured video by PCL Construction highlights the successful dismantling of the Old Eastern Avenue Bridge along Toronto's Lower Don Trail. This critical milestone is part of Waterfront Toronto's Broadview Eastern Flood Protection project, designed to mitigate flood risks in the eastern waterfront area. The aging, 90-year-old steel bridge posed a significant hazard, with concerns that rising floodwaters could dislodge it, potentially causing severe damage downstream. By removing the decommissioned structure, PCL and its expert partners are paving the way for a new flood protection landform, ensuring the safety and resilience of future developments, including the East Harbour Transit Hub and surrounding community.
