The group says, "We have friends who have worked at chemical plants in Louisiana, so we know how heavily asbestos was used in these types of workplaces-especially before the early 1980s. We also know that maintenance or repair crews and or their supervisors would have had routine exposure to asbestos on the job at a chemical plant in Louisiana before the mid-1980s. The only way a person can develop mesothelioma is asbestos exposure. At least 10,000 US Citizens who will be diagnosed with lung cancer this year were exposed to asbestos, and it is the asbestos that caused the lung cancer.
