North America includes the U.S., Canada, and Mexico. The expansion of the airline industry, and the rise in air traffic is expected to drive the growth of the market in the region. According to International Air Transport Association (IATA), North American airlines reported a 130.2% annual traffic rise in 2022 compared to 2021. As more people travel by air, the demand for efficient and reliable ground-handling services increases. Therefore, the surge in air traffic drives the demand for airport ground handling services. Moreover, an increase in demand for air cargo services owing to the rise in e-commerce and international trade activities contributes to the growth of air traffic

The rise in demand for air travel, the expansion of airline fleets, and the surge in demand for air cargo services are expected to drive the growth of the market. Moreover, the U.S. invests in upgrading its airports and modernizing the infrastructure of airports. For instance, in February 2023, the U.S. awarded \$1 billion in federal funds for various upgrades to infrastructure including terminals, security screening and baggage systems, access roads, and air traffic control towers.

Such developments lead to increased demand for more advanced and efficient ground-handling services which further drive the growth of the market.

The market for airport ground handling in Canada has grown steadily owing to factors such as increased air traffic, a rise in demand for freight transportation, and the need for efficient and cost-effective ground handling services. Moreover, there is a rise in demand for ground handling facilities to provide cargo handling services to airports in Canada. For instance, in March 2022, Air Canada announced the completion of Air Canada Cargo's new cold chain handling facility at the Cargo Facility at Toronto Pearson International Airport.

Airport ground handling service providers aim to offer passenger handling services for a secure, seamless, rapid, and positive travel experience. Moreover, numerous airlines sign contracts with ground handling companies for safe, reliable, cost-efficient, and effective passenger handling. For instance, in January 2022, Menzies secured two new contracts with American Airlines, for the delivery of passenger, ramp, and cabin cleaning services at Chetumal. Therefore, a rise in the number of contracts to provide ground handling services is expected to drive the growth of the market.

On the basis of airport, the global airport ground handling market has been segmented into domestic, and international. The domestic segment includes companies that provide ground handling services to domestic airports. Domestic airports are types of airports that handle travel within a single country. These airports are frequently smaller and less crowded than international airports, and are crucial for domestic travel, which includes both business and pleasure travel.

Domestic airports require similar ground handling services to those required by international airports. At domestic airports, essential ground handling services include ramp handling, cargo handling, aircraft handling, fueling, passenger handling, and others. Numerous ground handling providers receive contracts from domestic and international airports to support their ground handling services. For instance, in December 2022, Celibi India announced its appointment as ground handling service provider at Chennai airport. Such developments are expected to drive the growth of the segment in the market during the forecast period.
