Prime determinants of growth

Improved customer services with the help of chatbots, virtual helpers, and artificial intelligence interfaces and use in fraud detection drive the growth of the global AI in fintech market. However, strict laws restrain the market growth. Contrarily, fintech companies are increasingly harnessing the power of AI for fintech crypto to automate workflows, improve decision making, and add value. Therefore, this is a major factor expected to provide lucrative opportunity in the coming years.

Covid-19 Scenario

The outbreak of the COVID-19 pandemic has had a positive impact on the growth of the AI in fintech market. This is due to adoption of advanced technologies such as artificial intelligence by most of the fintech companies. This technology is helping fintech companies by making both credit repair and credit monitoring faster and more accurate than before, thus providing customer satisfaction.

Furthermore, from process automation to using biometric identification to reduce credit fraud, AI is fueling improvements that deliver better results for consumers while also helping the fintech industry leaders operate more efficiently and profitably than before.

Moreover, many fintech companies have experienced a surge in demand as working practices and customer banking habits changed during the COVID-19 pandemic. The advent of AI-based financial services has created faster, more efficient, and typically cheaper banking as compared to traditional financial services.

This trend is going to continue in the post-pandemic as well.

The solutions segment to maintain its leadership status throughout the forecast period

Based on component, the solutions segment held the highest market share in 2021, accounting for more than three-fifths of the global AI in Fintech market, and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the fact that most fintech firms have started adopting AI and advanced machine learning algorithms to manage the massive volume of data being generated for meaningful insights and better-informed decisions. However, the services segment is projected to manifest the highest CAGR of 26.9% from 2022 to 2031, due to rise in demand for software-as-a-service (SaaS).

The on-premise segment to maintain its lead position during the forecast period

Based on deployment mode, the on-premise segment accounted for the largest share in 2021, contributing to around two-thirds of the global AI in fintech market. On-premise deployment offers enhanced security features, which drive their adoption for AI in financial technologies. However, the cloud segment is expected to portray the largest CAGR of 28.9% from 2022 to 2031, owing to the advantage of cloud deployment in enabling businesses to manage volatile work environments.

The virtual assistant (chatbots) segment to maintain its lead position during the forecast period

Based on application, the virtual assistant (chatbots) segment accounted for the largest share in 2021, contributing to more than one-third of the global AI in fintech market, and is projected to maintain its lead position during the forecast period. With a robust increase in the number of online applications & smart devices that are required in the connected world, the need for the exposing additional data through the API technology is rising in the market. Furthermore, there is increase in requirement for the businesses to adopt the API technology to provide the

personalized and better user experience. These factors play a crucial role for making this segment the fastest growing segment. The research also analyzes business analytics and reporting & customer behavioral analytics segments.

North America to maintain its dominance by 2031

Based on region, North America held the highest market share in terms of revenue 2021, accounting for more than one-third of the global AI in fintech market. The increasing adoption of technology in the finance sector, such as artificial intelligence (AI) and machine learning (ML) is a major factor for the growth of AI in FinTech market in North America. However, the Asia-Pacific region is expected to witness the fastest CAGR of 25.0% from 2022 to 2031. This is due to the fact that surge in adoption of artificial intelligence (AI) and machine learning (ML) in financial markets in the region.
