

Seller Assistant Introduces Unique Price List Analyzer – A Powerful Tool for Profitable Product Sourcing on Amazon

SAN DIEGO, CA, UNITED STATES, March 12, 2025 /EINPresswire.com/ -- [Seller Assistant](#), a leading platform for [Amazon sellers](#), has launched [Price List Analyzer](#) – a powerful tool designed to accelerate price analysis, identify profitable deals, and optimize sourcing strategies. With this tool, sellers can avoid unprofitable investments, quickly find high-margin products, and adapt to market dynamics more effectively.

Common Challenges for Sellers and How Price List Analyzer Solves Them

□ Difficulty Analyzing Large Data Volumes

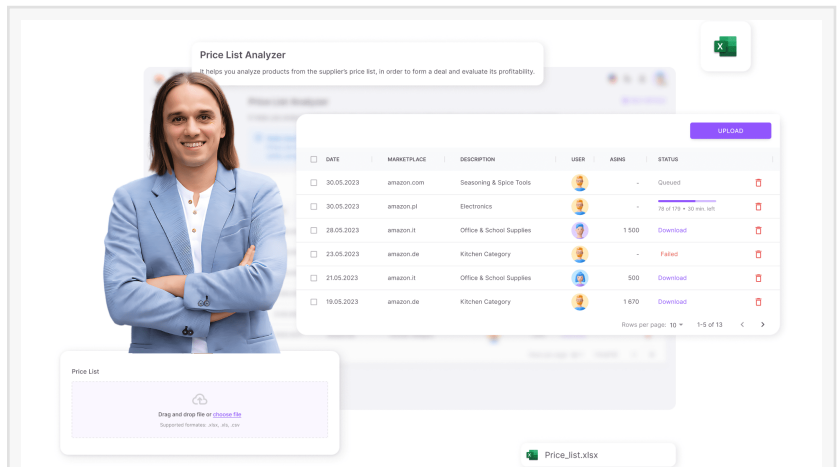

Sellers often upload massive price lists, but without advanced tools, analyzing the data becomes a time-consuming process. Price List Analyzer automatically filters products, removing unprofitable items and highlighting the best opportunities based on custom parameters.

□ Errors in Profit Calculation

Choosing products without considering all costs (Amazon fees, logistics, taxes) can lead to unprofitable deals. Price List Analyzer accounts for all expenses and forecasts net profit for both FBA and FBM models, helping sellers make informed decisions.

□ Manual Checking for Listing Restrictions

Some products require Amazon approval or may be restricted. This tool automatically scans

Amazon seller Software

listing restrictions, saving sellers time by eliminating the need for manual checks.

❑ Lack of Flexibility in Data Export

Most tools only allow full list exports, which can be inefficient. Price List Analyzer exports only filtered products in a convenient format while preserving user-defined table settings.

Key Benefits of Price List Analyzer

❑ Flexible Filtering System

Filter by category, brand, price, competition level, sales volume, FBA/FBM fulfillment models, and more.

❑ Automated Profit Calculation

The system analyzes not just current prices but also logistics, fees, taxes, and market trends, allowing sellers to see the actual profit margins for each product.

❑ Filtered Export

Export only profitable products – saving time on manual sorting. The exported file retains the table structure, including custom column order.

❑ Intelligent Sorting

Automatically ranks products by profitability (highest to lowest), enabling sellers to identify top opportunities instantly.

Optimize Your Product Sourcing Today

With Price List Analyzer, Amazon sellers gain a competitive edge, reduce the time spent on data analysis, and minimize the risks of poor sourcing decisions.

About Seller Assistant

Seller Assistant is an all-in-one solution that helps Amazon sellers optimize product sourcing, pricing, and sales strategies through advanced data analytics and automation.
