

# Encore Concierge Medicine and OpenDNA Announce Strategic Partnership to Offer Advanced AI-Driven Genetic Screening Tests

*Encore Concierge Medicine and OpenDNA Announce Strategic Partnership to Offer Advanced AI-Driven Genetic and Clinical Screening Tests*

CHICAGO AND GAITHERSBURG, MD, UNITED STATES, March 17, 2025 /EINPresswire.com/ -- Encore Concierge Medicine, a leader in personalized healthcare, is excited to announce a strategic partnership with OpenDNA, an innovator in AI-driven genetic and clinical screening solutions. This collaboration will allow Encore Concierge Medicine to offer its patients cutting-edge polygenic and monogenic personalized screening tests: CardioRisk+, CancerRisk+, and TotalRisk+, developed by OpenDNA.

OpenDNA's advanced screening technology combines artificial intelligence, comprehensive genetic insights, and clinical data to assess individual health risks with unmatched precision. The Polygenic Risk Score (PRS) in the CardioRisk+ test identifies polygenic cardiovascular risks, the CancerRisk+ test evaluates predispositions to various cancers, and the TotalRisk+ test provides a comprehensive assessment of overall genetic health risks based on both polygenic and monogenic clinical data. These tests equip patients and physicians with critical insights to guide proactive, preventative, and personalized healthcare.

"This partnership perfectly aligns with our mission to provide the highest standard of concierge medicine," said Dr. Julia Gold, Founder and Lead Physician of Encore Concierge Medicine. "By integrating OpenDNA's advanced genetic risk assessments into our practice, we offer patients unparalleled insights into their health, empowering them to make informed decisions for a longer, healthier life."

OpenDNA's AI-driven technology analyzes genetic and clinical data with precision, helping physicians tailor health recommendations based on each patient's unique risk profile. As predictive medicine continues to grow in importance, this collaboration demonstrates both companies' commitment to shaping the future of personalized healthcare.

"We are thrilled to partner with Encore Concierge Medicine to bring our AI-driven screening tests to their patients," said Dr. Eran Feldhay, Founder and CEO of OpenDNA. "Together, we are making personalized, preventive medicine more accessible and actionable than ever."

The integration of OpenDNA's genetic risk assessments into Encore Concierge Medicine's services marks a significant step forward in concierge healthcare, setting a new standard for precision medicine.
