<https://www.alliedmarketresearch.com/request-sample/214544>

Rise in prevalence of dental infections such as dental caries and periodontal diseases, increase in adoption of portable dental chairs, and rise in advancements in portable dental chair design drive the growth of the global portable dental chair market. However, a shortage of dental specialists is expected to restrict the market growth. Moreover, the growth opportunities in emerging markets present new opportunities in the coming years.

## Drivers:

- Rise in prevalence of dental infections
- Increase in adoption of portable dental chairs
- Advancements in portable dental chair design

## Opportunity:

- Growth opportunities in emerging markets

## Restraint:

- Shortage of dental specialists

## Economic Downturn Analysis: Impact of Recession in 2023 on the Portable Dental Chair Market

During a recession, individuals and governments might tighten their budgets, leading to reduced healthcare spending. This could affect patients' ability to access and afford portable dental chair products, potentially leading to decreased demand for these products. In addition, dental professionals may delay or cancel capital expenditures, including the purchase of new portable

dental chairs, during a recession.

However, the rise in demand for the mobile industry and rise in number of dental surgeries are experiencing a moderate positive impact from the global recession.

The examination segment to maintain its leadership status throughout the forecast period

Based on application, the examination segment held the largest market share in 2022, more than three-fifths of the global portable dental chair market revenue and is estimated to maintain its leadership status throughout the forecast period, owing to the rise in awareness about the oral health, and the importance of oral health.

The dental clinics segment to maintain its lead position during the forecast period

Based on end user, the dental clinics segment accounted for the largest share in 2022, contributing to more than half of the global portable dental chair market revenue, and is projected to maintain its lead position during the forecast period. This is attributed to the rise in need for versatile solutions, technological advancements, adaptability of portable dental chairs in clinics, and space-saving benefits. However, the others segment is expected to witness the fastest CAGR of 4.9% from 2023 to 2032. This is attributed to a rise in adoption of portable dental chairs in academic & research institutes, a rise in awareness of oral health and the importance of regular dental check-ups.

North America to maintain its dominance by 2032

Based on region, North America held the largest market share in terms of revenue in 2022, accounting for more than two-fifths of the global portable dental chair market revenue and is likely to dominate the market during the forecast period. Well-developed healthcare infrastructure and rise in prevalence of oral diseases promoted the growth of the portable dental chair market in North America.

For Procurement Information- <https://www.alliedmarketresearch.com/purchase-enquiry/214544>

However, the Asia-Pacific region is expected to witness the fastest CAGR of 5.5% from 2023 to 2032. High prevalence of geriatric population with increase in need of dental procedures, surge in prevalence of oral diseases, and surge in healthcare expenditure in the Asia-Pacific region, is expected to drive the growth of the portable dental chair market.
