

# Cosmos Purchasing Reveals an Extended Selection of Military Aviation Parts to Address a Rising Volume of Requisitions

*ASAP Semiconductor reveals efforts to meet rising industry demand for military aviation parts with expanded offerings and website features on Cosmos Purchasing.*

ANAHEIM, CA, UNITED STATES, March 20, 2025 /EINPresswire.com/ -- California distributor ASAP Semiconductor announced today that it is moving to expand the selection of military aviation part offerings that are to be available through its specialized

procurement platform, Cosmos Purchasing. While the website currently serves to connect the company's aviation and aerospace customer base with a wide range of civil and defense solutions, this particular initiative is specifically aimed at meeting a rising volume of requisitions and interest for [military-grade aviation hardware](#), military aircraft replacement parts, and other key aviation maintenance solutions.

“

We remain steadily committed to addressing the rigorous demands that our military aviation and aerospace customers face with dependable nose-to-tail product solutions being added to our stock.”

*Joe Faruqui*

There are many factors that are currently driving [demand for military aviation parts](#), including heightened defense operations across the globe, a steady trend of fleet modernization efforts, and ongoing maintenance and repair activities that keep current aircraft operating and airworthy. Additionally, the market has also seen rapid changes in recent months as geopolitical situations and trade have become more volatile, furthering interest in reliable defense-sourcing solutions that address long lead-time items or highly in-demand products. By refining

offerings on Cosmos Purchasing to align with evolving needs as they are identified, ASAP Semiconductor seeks to alleviate the challenges faced by its global customer base in regards to accessing mission-critical parts that meet military specifications.

Cosmos Purchasing

The expansion of Cosmos Purchasing is entirely data-driven, with ASAP Semiconductor conducting thorough market analysis to guide inventory management. As per the distributor, key product families, part types, and part numbers experiencing the most heightened demand are continuously identified through thorough customer engagement, the monitoring of industry trends, the analysis of purchasing patterns, and other practices, facilitating preemptive adjustments to stock levels. Through these efforts, ASAP Semiconductor is actively pursuing the goal of establishing Cosmos Purchasing as a single-sourcing solution for parts related to engines, avionics, systems, and structures, with everything from military aviation hardware and fasteners to electronic and electromechanical part numbers being diversified. This is stated to reduce the need for customers to shop on multiple platforms for their project needs, promoting potential time and cost savings.

Beyond enhancing key military aviation offerings, this initiative also encompasses the further development of Cosmos Purchasing's website features to simplify locating newly listed items as they are added. For example, specialized catalogs are already provided on the platform for [finding parts by NSN](#), CAGE Code, NIIN, and other standardized designators, with present updates being aimed at improving procurement resources, search tools, and product information to assist customers in purchasing any mission-critical items.

ASAP Semiconductor is also making significant internal investments to support the increasing demand for military aviation parts it is facing on Cosmos Purchasing and other defense-oriented aviation purchasing platforms. Moving further into the new year, the company has continued to focus on developing its team of procurement specialists, customer service representatives, and logistics personnel to ensure that orders made online or through phone and email are processed efficiently and accurately. The distributor attests that these efforts are intended to provide customers with hands-on assistance, ensuring that each order is carried to completion with a high level of care and professionalism.

"We remain steadily committed to addressing the rigorous demands that our military aviation and aerospace customers face with dependable nose-to-tail product solutions being added to our stock," stated Joe Faruqui, CEO of ASAP Semiconductor. "Through the strategic development of website offerings on Cosmos Purchasing and the onboarding of new representatives, we press forward with the goal of streamlining the procurement experience of our customers."

Moving into the future, ASAP Semiconductor will continue to carefully evaluate market conditions and adjust the inventory of Cosmos Purchasing and other platforms it operates to meet evolving customer needs. For more information about the enhanced inventory offerings on Cosmos Purchasing or to explore the extensive range of military aviation parts available, visit <https://www.cosmospurchasing.com/> or contact representatives of ASAP Semiconductor directly for personalized assistance.

About Cosmos Purchasing

Cosmos Purchasing is a procurement platform owned and operated by ASAP Semiconductor, connecting customers with a comprehensive selection of fasteners, hardware, electronics, and assemblies that find use in civil and defense aviation applications. With a customer base including defense contractors, repair stations, manufacturers, and other industry professionals, the website maintains a diverse stock of quality assured items that are strictly sourced from a network of trusted manufacturers and suppliers. All orders placed through Cosmos Purchasing are handled by ASAP Semiconductor's dedicated team of account managers as well, ensuring competitive pricing, timely delivery, and hands-on service through each step of fulfillment.
