Research Company

The Business Research Company

Dedicated research indicates that the global market for complicated urinary tract infection treatment is on a steady growth trajectory, with predictions the market will grow substantially from \$8.87 billion in 2024 to \$9.47 billion in 2025 at a compound annual growth rate CAGR of 6.8%. This significant growth during the historical period can be attributed to the increasing prevalence of urinary tract infections, the rise in cases of antibiotic resistance, a growing geriatric population, increased hospitalization rates, and rising awareness about UTIs.

“

The complicated urinary tract infection treatment market size is expected to see strong growth in the next few years. It will grow to \$12.13 billion in 2029 at a CAGR of 6.4%.”

What are the significant factors expected to drive market growth?

A rising incidence of chronic kidney diseases is anticipated to propel the market growth further. Chronic Kidney Disease CKD, characterized by the gradual loss of kidney function over time, is primarily driven by increasing rates of diabetes and hypertension, aging populations, and lifestyle factors such as obesity and smoking. Furthermore, the beneficial role played by complicated urinary tract infection treatment in supporting CKD patients by preventing severe infections that can exacerbate kidney damage only adds further impetus to potential market growth.
