Wondering about the recent market growth of Guillain Barre Syndrome?

“

Updated 2025 Market  
Reports Released: Trends,  
Forecasts to 2034 – Early  
Purchase Your Competitive  
Edge Today!”

*The Business research  
company*

The market size of Guillain-Barre syndrome has experienced robust growth in recent years. In 2024 it was assessed to be worth \$0.60 billion and is expected to expand to \$0.64 billion in 2025 at a compound annual growth rate CAGR of 5.9%. Growth within this historical period can be largely attributed to the rising demand for GBS treatments, amplification of vital infections, growing global vaccination campaigns, increasing understanding of autoimmune mechanisms, and raising both awareness and diagnosis.

Looking to understand the Market Size?

The market for Guillain-Barre syndrome is set to maintain substantial growth in the coming years, reaching \$0.79 billion in 2029 at a promising CAGR of 5.6%. This anticipated growth can be linked to the increasing prevalence of Guillain-Barre syndrome, the growing impact of climate change, the expanded usage of immunotherapies and drugs, escalating diagnostic capabilities, and the surging prevalence of multifocal motor neuropathy. Also, certain trends are presented within the forecast period.

What are the Growth Drivers for the [Guillain Barre Syndrome Market](#)?

One of the primary drivers for the growth of the Guillain-Barre syndrome market is the escalating risk of immunological diseases. Immunological diseases occur when the immune system is either overactive, underactive, or misdirected, leading to disorders like autoimmune diseases, allergies, and immunodeficiencies. These are increasing due to factors such as environmental changes, lifestyle, better diagnosis, and genetic predisposition. Interestingly, Immunological diseases can cause Guillain-Barre syndrome by encouraging an autoimmune response, where the body's immune system erroneously attacks the peripheral nerves, causing inflammation and nerve damage. For instance, in 2024, a report by the Joint United Nations Programme on HIV/AIDS stated that approximately 39.5 million people worldwide were living with HIV by the end of 2022. If this trend persists, the market can expect a significant surge.

Who are the Key Players in the Guillain Barre Syndrome Market?

There are numerous significant players in the Guillain-Barre syndrome market, including Pfizer Inc., Roche AG, Thermo Fisher Scientific Inc., AstraZeneca PLC, GSK plc, Takeda Pharmaceutical Company Limited, Merck & Co. Inc., Baxter International Inc., Biogen Inc., Horizon Therapeutics, Octapharma AG, Kedrion S.p.A., Annexon Inc., Immunovant Inc., CSL Behring LLC, Hansa Biopharma AB, NeuLine Health Inc., Ridge Diagnostics Inc., Deymed Diagnostic LLC, and VYVGART Hytrulo.

What are the Emerging Trends in the Market?

The prioritization of innovative drug development such as monoclonal antibodies by leading industries is one of the key trends emerging in the Guillain-Barre syndrome market. These laboratory-engineered proteins are designed to target specific antigens, helping to drum up immune responses and simultaneously improving therapeutic outcomes.

How is the [Guillain Barre Syndrome Market Segmented](#)?

The report segments the market by type, therapeutics, route of administration, and end-user. Further sub-segments include differing conditions such as Acute Inflammatory Demyelinating Polyneuropathy, Chronic Inflammatory Demyelinating Polyradiculoneuropathy, Miller Fisher Syndrome, and more.

What Is The Regional Analysis Of Guillain Barre Syndrome Market?

North America held the largest share in the Guillain-Barre syndrome market in 2024. However, the Asia-Pacific region is expected to register the fastest growth rate during the report's forecast.
