

Heranova Launches LDT-Validated HerResolve™ in the U.S., Advancing Non-Invasive Endometriosis Diagnosis for Women

Innovative blood test set to redefine patient experience with accurate and accessible endometriosis detection

BOSTON, MA, UNITED STATES, March 27, 2025 /EINPresswire.com/ -- [Heranova Lifesciences Inc.](https://www.heranova.com/), a leader in advancing women's health solutions, today

announced the successful completion of Laboratory Developed Test (LDT) validation for HerResolve™, a groundbreaking, non-invasive diagnostic test designed to transform the management of endometriosis. HerResolve™ will initially be launched at selected clinical centers, with nationwide expansion planned to maximize patient accessibility in collaboration with commercial partners.

“

With HerResolve™, we're committed to working with women and the medical community to redefine how endometriosis is diagnosed”

Penny Wan, co-founder and chairwoman of Heranova

Patients, clinicians, and healthcare providers interested in learning more about HerResolve™ and receiving updates and notifications on future availability can reach out via clinicalaffairs@heranova.com or visit <https://heranova.com/products/>.

Endometriosis, a chronic and often debilitating condition affecting more than 200 million women worldwide, has historically required invasive diagnostic procedures such as

laparoscopy, causing discomfort, risk, distress for patients and eventually diagnosis delay for patients. HerResolve™ offers a new, non-invasive process designed to aid in diagnosis — utilizing a simple blood test capable of diagnostic accuracy that is equivalent to, or better than, the current gold standard. Leveraging clinically significant miRNA biomarkers, proprietary AI algorithms, and sophisticated bioinformatics, HerResolve™ translates complex medical data into clear, actionable "positive/negative" results, enhancing both diagnostic efficiency and patient comfort.

“I am incredibly excited to announce this significant milestone,” said Penny Wan, co-founder and

chairwoman of Heranova. "Millions of women have suffered silently, enduring uncertainty and invasive procedures to seek answers for endometriosis. With HerResolve™, we're committed to working with women and the medical community to redefine how endometriosis is diagnosed—enabling earlier answers, timely treatment, and fewer years lost to uncertainty and pain through an accurate and convenient blood test."

"The Heranova team has achieved an important scientific milestone in the field of endometriosis," said Joe Leigh Simpson, MD FACOG, FACMG, FRCOG, former president of the International Federation of Fertility Societies and scientific advisory board member of Heranova. "With HerResolve™, they're not only addressing an unmet need that impacts millions of women worldwide, and is often responsible for unexplained infertility – they are also on the path of establishing a new, non-invasive gold standard of care, something we have all been waiting for. This innovation delivers real impact, transforming lives and setting a new benchmark for what women can expect. And Heranova is just getting started."
