

# NON PROFIT BABY QUEST FOUNDATION KICKS OFF NATIONAL INFERTILITY AWARENESS WEEK WITH RECORD-BREAKING GRANT AWARDS

*Baby Quest kicks off National Infertility Week with record grants, giving hope to 25 families—including wildfire first responders.*

LOS ANGELES, CA, UNITED STATES,  
April 7, 2025 /EINPresswire.com/ --

Baby Quest Foundation, a nonprofit dedicated to helping individuals and couples afford fertility treatments, is kicking off National Infertility Awareness Week on April 21st by awarding its largest-ever group of grants. Twenty-three new recipients, including three First Responder Grant honorees who battled the recent California wildfires, will receive financial assistance to help make their dreams of parenthood a reality.

Chosen from nearly 700 applicants, the grant recipients come from diverse backgrounds and locations across the United States. Each has faced a long and emotional struggle with infertility, exhausting personal savings on treatments that have not yet been successful. Thanks to Baby Quest, they now have renewed hope—and financial relief—as they continue their journey to build a family.

"This record-breaking grant cycle is a testament to our unwavering commitment to making fertility treatments accessible," said Pamela Hirsch, CEO and Founder of Baby Quest Foundation. "Infertility is a medical condition, yet financial barriers continue to stand in the way of so many deserving individuals. We are proud to provide hope, relief, and the opportunity to grow families that otherwise might not have been possible."

This year's group includes singles who are embarking on parenthood alone, individuals

preserving their fertility through egg freezing, and cancer survivors whose treatments impacted their ability to conceive. Many of the recipients serve their communities in law enforcement and the military, demonstrating resilience not only in their careers but also in their personal journeys to parenthood.

Since its founding in 2011, Baby Quest Foundation has provided more than \$3.5 million in grants, helping bring over 190 Baby Quest babies into the world—with at least 16 more pregnancies currently underway. The organization supports those in need of in vitro fertilization (IVF), gestational surrogacy, egg and sperm donation, embryo donation, and egg freezing. Committed to inclusivity, Baby Quest welcomes applications from heterosexual and same-sex couples, as well as single parents.

With one in eight individuals facing infertility, Baby Quest is more than just a grant program—it's a source of hope. By easing the financial burden of fertility treatments, the foundation empowers recipients to take the next step toward building their families.
