

# Business Reporter: Incorporating AI-powered capabilities into the FIN Framework

*The multiple ways in which FIN Intelligence can support building automation and management*

LONDON, UNITED KINGDOM, April 18, 2025 /EINPresswire.com/ -- In an article published on Business Reporter, smart buildings platform provider J2 Innovations talk about how their latest AI-powered update of the FIN Framework platform can help building automation professionals, system integrators and facility managers simplify, automate and optimise vital building management processes. FIN Framework is a state-of-the-art building automation platform known for its powerful tools and user-friendly design, which integrates seamlessly with building systems to offer full control over everything from HVAC systems to lighting, energy consumption and beyond.

J2 Innovations has upgraded the FIN Framework by introducing the first generative AI-powered features designed specifically for building automation to not only elevate operational efficiency but also make previously intricate processes remarkably simple by bridging the gap between users and building systems. System integrators will appreciate the new platform's Intelligent Tagging functionality, which can reduce project tagging time by up to 80 per cent. Designed with large language models, FIN's embedded assistant enables users to interact with their building systems through natural language and get immediate, actionable answers regarding energy consumption, configuration and the level of urgency of each alarm. The embedded assistant can not only answer queries but also provide real-time maintenance guidance for facility managers or service engineers. Business leaders seeking a competitive edge will also value the fact that intuitive platform of FIN Intelligence allows organisations to meet environmental, social and governance (ESG) targets while simplifying workflows.

To learn more about FIN Intelligence and how it can automate labour-intensive processes , [read the article](#).

## About Business Reporter

Business Reporter is an award-winning company producing supplements published in The Guardian and City AM, as well as content published on Business Reporter online hubs on Bloomberg.com, Independent.com, Business Insider Germany and Le Figaro, delivering news and analysis on issues affecting the international business community. It also hosts conferences, debates, breakfast meetings and exclusive summits.
