

# Artsyl's InvoiceAction 7.2 Launches with AI-Powered Invoice Workflows, Enhanced Controls, and ERP Synergy

*Delivering Intelligent AP Automation with Role-Based Enhancements, Audit-Ready Controls, and Cross-Industry ERP Integration*

VAUGHAN, ON, CANADA, April 23, 2025

/EINPresswire.com/ -- Artsyl Technologies, Inc., a leader in AI-powered intelligent process automation, today announced the launch of InvoiceAction 7.2, a major upgrade to its flagship accounts payable (AP) automation platform. Designed to eliminate manual invoice handling, improve data accuracy, and accelerate AP cycles, the new release brings cutting-edge AI-driven

features and enhanced ERP integration to help finance teams across industries transform invoice processing from a cost center into a value driver.

“

InvoiceAction 7.2 harnesses AI to drive smarter AP automation, boost accuracy, and deliver faster, more intelligent workflows with seamless ERP integration.”

*Artur Vassilyev, President /  
Dir. of Engineering at Artsyl  
Technologies*

InvoiceAction: A Proven Leader in End-to-End AP Automation

[InvoiceAction automates the entire accounts payable lifecycle](#) - from intelligent document capture and classification to data extraction, approval routing, ERP posting, and payment initiation. The solution supports seamless integration with over 50 ERP, ECM, and financial

platforms, including Microsoft Dynamics (Business Central, F&O, GP), NetSuite, SAP, Sage, Acumatica, QuickBooks, and more.

What's New in InvoiceAction 7.2

The latest release of InvoiceAction focuses on usability and compliance enhancements - many developed in response to customer feedback across multiple industries, including manufacturing, distribution, logistics, retail, and professional services.

Key updates include:

- AI-Powered Multi-Model Classification and Extraction – docAlpha 7.2 vertical solutions introduce the ability to combine several AI approaches to document classification and data extraction per workflow. This layered AI approach works in tandem with Artsyl’s signature machine learning-based self-learning feedback loop to significantly enhance data accuracy and flexibility.
- Multi-Level Approval Logic Enhancements – Streamlined invoice routing across departments, supporting complex organizational approval hierarchies with more flexibility and control.
- Improved Handling for Recurring Invoices – Enhanced logic and user interface for managing recurring vendor invoices, reducing manual intervention and ensuring payment continuity.
- Granular Invoice History Tracking – New audit trail capabilities provide detailed logs of invoice data changes, approvals, exceptions, and user activity - ideal for audit and compliance readiness.
- Smart Entry Point Settings by Department – Departments can now independently define invoice entry and processing preferences, increasing workflow efficiency for distributed teams.
- Expanded Field-Level Validation Rules – New configurations support tighter data validation before invoices are approved or exported to the ERP, improving data accuracy.
- Security and Usability Enhancements – UI refinements, session timeout controls, and role-based permissions simplify secure user interaction across organizations of all sizes.

### Built for AP Teams Seeking Scalability, Visibility, and Speed

InvoiceAction is used by organizations across North America and Europe to eliminate manual invoice entry, reduce approval cycle times by up to 80%, and increase data accuracy above 92%. With intelligent capture, automated matching, and configurable business rules, AP teams can scale with confidence while reducing processing costs.

“InvoiceAction 7.2 reflects our close collaboration with finance leaders who rely on our platform every day,” said Artur Vassylyev, CEO of Artsyl Technologies. “These enhancements may appear targeted, but they address real bottlenecks in AP workflows. Combined with the powerful [ERP integrations](#) and visibility Artsyl offers, customers can get more value from their automation strategy faster than ever.”

### Availability

InvoiceAction 7.2 is available immediately to all new customers and as a complimentary upgrade for existing cloud users. For on-premise installations, an upgrade path is available via Artsyl’s Professional Services team.
